Carrying Bag for the ME Geithain Table Stand for the RL 906 / RL 906 D

High quality custom padded carrying bag, specially designed for the Table Stand designed for the RL 906 / RL 906 D monitors for when they are needed on location.

Manufactured from tough fabric with foam protection. There are separate internal pockets for the bases and Y-brackets so they cannot knock against each other and scratch the finish. These pockets have Velcro flaps to close them. A small zipped internal pocket is included for the bolts and washers. The bag has been designed for both ruggedness and light weight. The handles go all round the bag to minimise any strain on the bag itself.

The bag incorporates an embroidered ME-Geithain Logo.

(NB: Table stand pictured is not included in the price of the bag)
