- + Dedicated and reliable equipment

## PREMIUM ACCOUNT

- + Portability - PREMIUM
- + Number Structure - PREMIUM
- + Speed Dial - PREMIUM
- + Group call numbers - PREMIUM
- + Optional blocking of incoming and outgoing calls - PREMIUM
- + Autonomous management of passwords - PREMIUM
- + Quarterly call history - PREMIUM

SIP protocol allows **easy-to-establish connections**, preventing the need of knowing the ever changing IP address of a mobile device. **It also offers safer management.**

Thanks to the AETA service, customers avoid the complexity and cost of setting up a server, as well as the burden of its maintenance, while at the same time providing greater security against hacking.

**AETA Audio Systems now integrates pre-registered and free factory SIP accounts into all AETA products out of production lines.** These accounts are exclusives for the unit and offer quick and easy connection to the SIP server.

Customers can also get **PREMIUM account that offers additional features** including portability to another SIP compliant machine.

## USING A SIP SERVER GREATLY SIMPLIFIES THE SET UP OF A CONNECTION

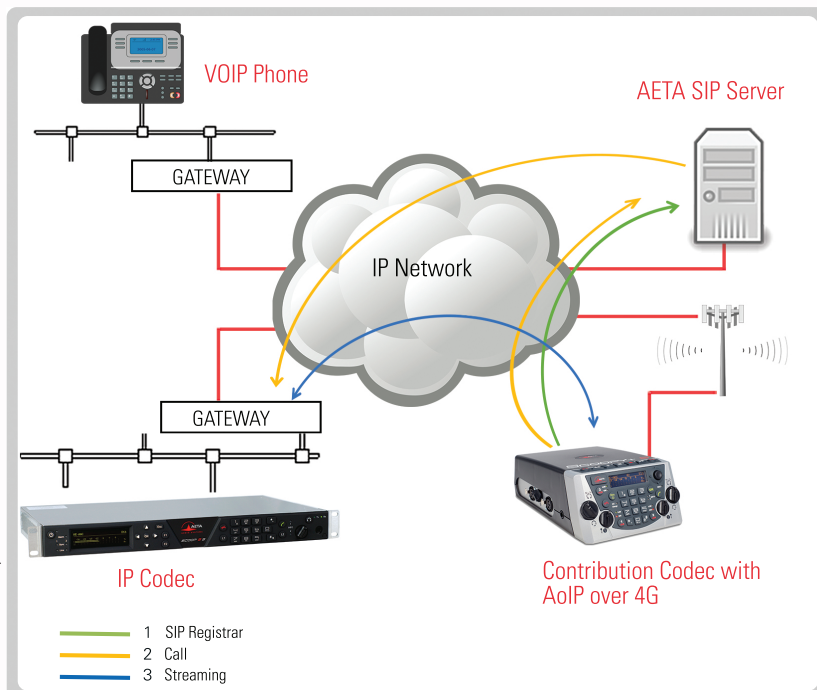

- Wherever you are, the SIP configuration does not change from one link to another, even in mobile use.
- Little change has to be done on the access router, and even on a possible firewall. In fact, in case of a standard internet router, usually there is just nothing to change.
- Only one number (SIP URI) must be known in order to set up a call to a new destination.

### ADDRESS OF THE SERVER:

sip.aeta-audio.com or sip.aeta-audio.fr  
(otherwise, numeric address: 85.214.119.212)  
The service is hosted in a data center on a dedicated server (TUV certified, ISO 27001 standard).

### BACKUP SERVER:

**To maintain service in all circumstances, the server is secured by a backup server, which is permanently active. In case of a failure of the main server, or for a maintenance action, the service can make a "hot" switchover to the backup server, while keeping all functions identical.**

## ADDITIONAL FEATURES OF THE AETA PREMIUM SIP SERVICE

- **Portability**  
A premium account can be used and transferred from and to any SIP compliant device, provided that this unit is compatible with the server.
- **Number structure**  
The SIP numbers allocated to premium accounts observe specific pattern that allow clear and simplified management when you have many accounts.
- **Speed Dial**  
For calling a number inside the same group, you can dial just the last 4 digits.  
Examples:  
45675412 calls 45675002 : call sent to 45675002  
45675412 calls 5002 : call sent to 45675002  
45995005 calls 5002 : call sent to 45995002
- **Group call numbers**  
*On request. Applies to the whole group.*  
With this feature, a remote device would just have to dial the number of a codec group and AETA SIP server would make the link with the first available codec within the group. This would prevent the user to have to dial different SIP numbers in case many codecs are already engaged.
- **"Incoming calls" blocking**  
*On request. Applies to the whole group.*  
When this feature is activated, the server does not relay to the group calls which are originated from devices external to the group.
- **"Outgoing calls" blocking**  
*On request. Applies to the whole group.*  
When this feature is activated, the server does not forward calls sent by a member of the group towards devices external to the group (except AETA test numbers).
- **Self-management of passwords**  
*On request. Applies to the whole group.*  
When this service is selected, AETA provides for every SIP account an on-line access to the server (login+password) that allows to edit ad libitum the password of the SIP account.
- **Quarterly call history**  
*On request. Applies to the whole group.*  
When this service is selected, AETA provides the subscriber, on each calendar quarter, a report of calls to better monitor the use of your SIP accounts.

## HOW TO SUBSCRIBE TO AETA PREMIUM SIP SERVICE:

- Subscription of an account for a duration of one year: 35 € HT
- Commissioning fees for a SIP account : 40 € HT

The fixed subscription allows a device registered on the server to set up connections of unlimited duration with any other device (or agent) also registered on the server. To subscribe, please contact our sales department : by e-mail [contact@aeta-audio.com](mailto:contact@aeta-audio.com) - by phone +33 1 41 36 12 00.
