

## SLK 906

### Flight Case for the ME Geithain RL 906 / RL 906 D

High quality custom flight case, specially designed for the RL 906 / RL 906 D for when the monitors are needed on location.

Manufactured from tough 7mm Astroboard, for both ruggedness and light weight, with recessed handles on the ends and lid (lid handle at the balance point).

Catches are high quality and recessed and the case has tough protective corners.

Internally the case is foam lined with dense foam to the front and rear of the monitors (they sit face to face), the side foams have cutaway points to enable easy extraction. The design incorporates a cable area for the mains and connection cables.

*(NB: Monitors and cables pictured are not included in the price of the bag)*
